

Grading Rubric

Final App Ideas:

- 1 Implement Core Data so that you have at least two entities linked together by a Core Data relationship.
- 1 Implement at least two UIViewController subclasses.
- 1 Include a UITableView that displays the data persisted in Core Data.
- 1 Add data to the database from an interface.

Additional items

Categories entered only show up after application restart. Try: tableView.reloadData() after adding a new item

to the array for the UITableViewController Data Source

Love the design work. The input modals work but be careful with entering a lot of data on tiny UI elements.

Grade: 105
